

Òscar Hernandez Ferrer

Frontend Developer · React JS · TypeScript

Calafell, España · oscarherfer97@gmail.com · [LinkedIn](#) · [GitHub / raxdevFrontier](#)

PROFESSIONAL PROFILE

Frontend Developer with 3+ years of experience in React JS and TypeScript within large-scale ecommerce projects in a corporate environment (NTT DATA). Background in Electronic Engineering, bringing an analytical and problem-solving mindset. Proven experience in API integration, responsive design, and collaboration within multidisciplinary teams using agile methodologies. Seeking a mid-level role to continue growing in component architecture and frontend performance

WORK EXPERIENCE

Frontend Developer (Junior → Mid) · NTT DATA — Barcelona

February 2022 – Present · 3 years 3 months

Ecommerce Project · Restaurant Industry (June 2022 – Present)

- I was involved in the development of an e-commerce platform based on a microfrontend architecture, contributing to the integration and communication between independent modules.
- I developed and maintained numerous reusable components in React using TypeScript, optimising development times and the implementation of new features.
- I collaborated on the creation of a component library (Design System) using Stencil JS, ensuring visual consistency and maintainability across the different microfrontends.
- I ensured full compatibility on mobile, tablet and desktop through responsive layout across multiple key screens.
- I integrated a comprehensive set of REST endpoints, managing state with TanStack Query hooks and optimising perceived load times.
- I detected and fixed a large number of critical pre-production bugs through manual testing and code review, preventing customer incidents.
- I maintained comprehensive technical documentation coverage for the assigned modules, facilitating the onboarding of new team members.
- I collaborated on 2-week agile sprints with a multidisciplinary team (devs, QA, design, PM), consistently meeting delivery estimates.

Web Analytics Project · Google Analytics (February 2023 – December 2023)

- I defined the tagging plan for a wide range of web and mobile screens, enabling the tracking of key events for the data team.
- I significantly reduced GA4 implementation errors by systematically reviewing use cases alongside the QA team.

QA Engineer — Aplicaciones Móviles · VASS — Barcelona

October 2021 – February 2023 · 1 year 4 months

Android/iOS App · Automotive Industry

- I designed a comprehensive set of use cases to validate communication between the app and the vehicle hardware, achieving zero major defects in production.
- I carried out full regression cycles on physical devices, significantly reducing the time taken to detect bugs compared to the previous cycle.
