

Òscar Hernandez Ferrer

Frontend Developer · React JS · TypeScript

Calafell, España · oscarherfer97@gmail.com · [LinkedIn](#) · [GitHub / raxdevFrontier](#)

PROFESSIONAL PROFILE

Frontend Developer with more than 3 years of experience in modern web app development using React, TypeScript and Angular. I have worked on e-commerce projects and content platforms, using microfrontend architectures, server-side rendering (SSR) and design systems

My background in Telecommunications Engineering has given me strong analytical skills and a constant focus on problem-solving and continuous improvement, complemented by experience working in multidisciplinary teams and using Agile methodologies.

WORK EXPERIENCE

Frontend Developer (Junior → Mid) · NTT DATA — Barcelona

February 2023 – June 2026

Main responsibilities

- Development and evolution of front-end applications using React, TypeScript and Angular.
- Implementation of architectures based on microfrontends and server-side rendering (SSR).
- Development and maintenance of reusable components and design systems using React and StencilJS.
- Integration of REST APIs and efficient data state management using TanStack Query.
- Design and implementation of responsive interfaces for multiple devices.
- Collaboration with multidisciplinary teams using Agile methodologies and participation in code reviews.

Featured projects

- Ecommerce (React, TS, Microfrontends).
- Content platforms (Angular, SSR)
- Web analytics (GA4)

QA Engineer — Aplicaciones Móviles · VASS — Barcelona

October 2021 – February 2023

Main responsibilities

- I designed and executed test cases to validate communication between mobile apps and in-vehicle hardware, helping to ensure there were no critical defects in production.
- I carried out full regression test cycles on Android and iOS devices, speeding up the detection and resolution of issues prior to each release.

Featured projects

- Vehicle connectivity (Android, iOS).
